Combatting Scams

As digital transactions become more prevalent, scammers are employing increasingly sophisticated tactics to exploit vulnerabilities and target victims. In Singapore, we have consistently emphasised the need for a whole-of-ecosystem approach to scams, fostering collaboration across multiple Government agencies, as well as private sector entities. Equally crucial is an informed and vigilant public, which serves as a cornerstone in the collective fight against scams.

Singapore's Broad Strategy to Combat Scams

Upstream Measures

First, upstream measures, such as the ScamShield mobile app to filter and block scam messages and calls, and the SMS Sender ID Registry regime to label non-registered senders with the “Likely-SCAM” label.

Downstream Measures

Second, downstream measures; these include bank measures implemented to strengthen anti-malware controls, fraud surveillance, and detection capabilities.

Public Education

Third, public education, through public advisories and sharing best practices to fight scams.

- Reply to Adjournment Motion on “Losses from Scams and Malware Fraud: Doing Right by Bank Customers” by Mr Alvin Tan, Minister of State, Ministry of Trade and Industry and Ministry of Culture, Community and Youth, and Board member of MAS, on behalf of Mr Lawrence Wong, Deputy Prime Minister and Minister for Finance, and Chairman of MAS, on 18 September 2023
- "Bolstering the Security of Digital Banking" - Ministerial Statement by Mr Lawrence Wong, Minister for Finance and Deputy Chairman of the Monetary Authority of Singapore (MAS), on behalf of Mr Tharman Shanmugaratnam, Senior Minister and Minister-in-charge of MAS, on 15 February 2022

What is the Shared Responsibility Framework?

The Shared Responsibility Framework (SRF) for phishing scams was introduced by MAS and Infocomm Media Development Authority of Singapore (IMDA) to strengthen the direct accountability of financial institutions and telecommunications providers to consumers for losses incurred from such scams. This framework assigns duties to mitigate phishing scams and sets expectations of payouts to affected scam victims where these duties are breached.

Participants in the SRF include the following.

Financial Institutions

• Custodians of consumers' money • Have primary responsibility to safeguard consumers' accounts • Gatekeeper against outflow of monies arising from scams

Telcos

• Secondary role as supporting infrastructure player • SMS as an official communication channel and as a means of sending authorisation access codes

Consumers

• Vigilance remains the first line of defense against scams

Consultation Papers and Responses

Consultation Paper and Response on Shared Responsibility Framework

The consultation paper and response set out MAS' and IMDA's policy objectives and details of the SRF. They clarify the allocation of responsibility for losses arising from a defined scope of phishing scams under the SRF, and the operational workflow for consumers to report such scams.

If you suspect that you may be a victim of scam, please contact your Financial Institution (FI) immediately, and report to the Police. Your FI will coordinate the investigation and will follow up with you as necessary, including advising if the case is a phishing scam that falls within the SRF.

General workflow of the Shared Responsibility Framework

1

Claim Stage

Consumer must furnish a valid email address and any other supporting information such as a police report and digital communication trail(s).

2

Investigation Stage

FIs will be the main contact point with the consumer. FIs may include the Telco into the communication chain with the consumer in specific situations, for example, to address a Telco-specific query for an SRF claim.

3

Outcome Stage

The FI (or Telco in specific situations) informs victim of outcome of investigation.

4

Recourse Stage

Existing avenues of dispute resolution

List of banks that the SRF applies to

Name of banks

1. BANK OF CHINA LIMITED
2. CITIBANK SINGAPORE LIMITED
3. CIMB BANK BERHAD
4. DBS BANK LTD.
